

The K-LOVE radio station that is broadcast through an FM translator service is a faithful servant to the Dayton, Ohio community. Through their caring words, music, and messages, listeners in Dayton are being encouraged to invest in their families and communities.

If this station were replaced by an LPFM broadcaster providing alternate programming it would be an incredible disappointment to those whose lives are directly impacted by K-LOVE programming.

Continuing the current FM service that allows K-LOVE to reach communities like Dayton will be in the best interest of the public.

The station programming affects such things as stress level, attitudes of patience and forgiveness, and motivation to serve the community and nation. In direct relation, I believe these attitudes impact important issues such as road-rage, work-related stress, and national patriotism. Please allow this beneficial service to continue by allowing the FM translator service to hold priority.

Thank you.
